EN 中文

Hi. I'm Malick.

I am a **Research Engineer** working at the frontier of AI and Computational Neuroscience.

DEEP LEARNING | MANIFOLD ALIGNMENT | VR SIMULATION | NEURAL DECODING

Currently at ***Nankai University***, I am building the **Universal Narrative Engine**. My work involves decoding latent neural states from the Alice Dataset.

Beyond the lab, find me on the **football** pitch, at the **billiards** table, or playing **ping pong**. I believe research is fueled by a spicy plate of *Gong Bao chicken* in Tianjin or the comforting taste of West African staples from home.

CURRENTLY DECODING ALICE DATASET

The Universal Narrative Engine

Nankai University | Current

Thesis: Manifold Alignment and Zero-Shot Decoding of Latent Neural States

VR & ALICE DATA SIMULATOR

Using Virtual Reality as an interface/simulator to visualize high-dimensional manifold alignment and interact with neural trajectories decoded from the Alice dataset.

Diagnosis Classification Study

MRC Unit The Gambia at LSHTM

Postgraduate Research Visitor

Analyzed clinical and laboratory datasets across West Africa to develop predictive classification models for Bacterial Meningitis diagnosis, bridging public health data with machine learning.

Cortical Visual Processing

CMU Africa | Trend CAMINA

Summer School Research Participant (July 2024)

Modeled the differential processing of visual information by cortical inhibitory and excitatory neurons, focusing on the computational foundations of cortical circuitry.

Emerging Class Discovery in LLMs

IndabaX Gambia | 2025

Research Participant

Investigated semantic co-occurrence patterns in large text corpora to improve representation learning and class discovery within Large Language Models (LLMs).

SKILLS & COMPETENCES

RESEARCH & STRATEGY

- Neural data analysis & encoding/decoding
- Computational modeling of brain activity
- Multimodal representation analysis
- Open source systems research

PERSONAL STRENGTHS

Leadership, Community building (AI Gambia Network), Project management, and Cross-functional team collaboration.

SOFTWARE & TOOLS

PYTORCH TENSORFLOW MNE-PYTHON BRIAN2 ALLENSDK PYTHON / KOTLIN / FLUTTER DOCKER / LINUX SIGNAL PROCESSING

TEACHING

Teaching Assistant

University of The Gambia

Human-Computer Interaction & Intelligent Systems

INDUSTRIAL EXPERIENCE

SOFTWARE ENGINEER

University of The Gambia

- Designed and deployed digital platforms for academic management and research support, modernizing institutional data workflows.
- Collaborated on the university's digital transformation strategy to improve institutional efficiency and transparency.

2023 — Present

SOFTWARE ENGINEER

2M CORP

- Developed tailored health information systems for the Government of Niue, Kaduna State, and The Gambia.
- Implemented scalable, secure public data management platforms aligned with international public sector digital standards.

2022 — 2023

JUNIOR SOFTWARE ENGINEER INTERN

University of The Gambia

AWARDS & HONORS

MOFCOM SCHOLARSHIP AWARD

Chinese Government Scholarship for Postgraduate Excellence at Nankai University.

China

3RD PLACE: LARGE MODEL REASONING ENGINE

Inference Optimization Competition — Ranked 3rd out of 200+ global teams.

OpenKylin Community

3RD PLACE: DATA SCIENCE FOR HEALTH IDEATHON AFRICA

Google Sponsored — Developed ***MKUNGA***, an AI-driven Swahili antenatal triage system.

Pan-Africa

NEW STAR OF THE YEAR AWARD

Recognized at the OpenKylin Global Developer Conference for community contributions.

Beijing

POSTER PRESENTER AWARD

Deep Learning Indaba — Recognizing excellence in research presentation.

Kigali, Rwanda
